

**2023-2024 EPISODE V: EP WEBINARS BY EPs**  
**ADDRESSING LIQUEFACTION FOR A MULTI-FAMILY RESIDENTIAL STRUCTURE IN IRVINE**  
**FRIDAY, DECEMBER 8 | 11 – 11:30 AM | ZOOM**

**REGISTER NOW**

**Jose Will Address These Aspects of Liquefaction Challenges in Irvine**

- Seismic hazards and settlement issues at the site
- Liquefaction analysis using Cone Penetration Testing (CPT)
- Project solutions that avoided overdesign and controlled cost

**Jose Cejudo**

*Staff Engineer, Geocon West, Inc.*

A Cal State Fullerton alumnus, Jose graduated in 2020 with a B.S. degree in Civil Engineering. There he served as an officer in both the CalGeo and the ASCE student chapters. While in school, he interned at Geocon West, Inc., working in the laboratory performing various types of soil tests. Hired full time upon graduation, he began doing field inspections, including certifying footing bottoms and conducting nuke testing on compacted fill. He has since gone on to performing geotechnical investigations and writing geotechnical reports.
