

ENHANCING SAFETY AND RESILIENCE OF THE URBAN ENVIRONMENT THROUGH SATELLITE REMOTE SENSING IN THE CONTEXT OF ACCELERATED CLIMATE CHANGE

THURSDAY, SEPTEMBER 12 | 11 AM–NOON | ZOOM

**REGISTER
NOW**

Learn how GEOFEM uses satellites to:

- Assess susceptibility to landslides, expansive clays and other geohazards
- Measure soil moisture content
- Enhance safety, reduce maintenance costs, and improve planning and response strategies, extending the lifespan of critical infrastructure and minimizing disruptions
