

TECHNICAL REPORT WRITING VIA QUIRE

WEDNESDAY, JANUARY 29 | 11 AM–NOON | ZOOM

**REGISTER
NOW**

Join us to learn why firms using Quire Technical Report Management™ (TRM™) experienced a significant rise in geotechnical engineering report activity in 2024.

- Improve technical report throughput
- Boost report writing and editing efficiency
- Drive down associated costs
- Enhance the quality of the end product, the visible representation of your work

Kelly L. Stratton, Quire Founder & President, has done time in the field as a civil and environmental engineer. She knows first-hand what it's like trying to integrate data and details manually at 4 a.m. the day the report is due. She's in it to win it—which is why she took out a second mortgage to build Quire. She didn't do it alone. There's an entire team of recovering report writers, engineers and customer services reps that make Quire the game-changing solution that it is.
