

GEOTECHNICAL DATA MANAGEMENT & REPORTING

WEDNESDAY, MAY 14 | 11 AM–NOON | ZOOM

**REGISTER
NOW**

This webinar explores the future of geotechnical data management and reporting with modern software. As geotechnical projects become more complex and fast-paced, firms still relying on manual workflows risk falling behind. In this practical session, CEO Adam Loewentheil addresses how to use software to eliminate inefficiencies, improve accuracy, and produce faster, more polished technical reports.

Consider These Key Takeaways...

- Why modernizing now matters
- Alternatives to popular softwares
- Aldoa comparables to other options
- Live demo of the Aldoa platform
- Live Q&A with CEO Adam Loewentheil

...To Crush These Pain Points

- Redundant manual work (field and office)
- Data re-entry and transcription errors
- Inaccurate or inconsistent reporting
- Poor visibility into project data and progress
- Long turnaround times for final deliverables
