

2025 EPISODE V: EP WEBINARS BY EPs

PLANNING AND EXECUTING GEOTECHNICAL EXPLORATIONS FOR SEISMIC EVALUATION OF EMBANKMENT DAMS

FRIDAY, DECEMBER 12 | 11 – 11:30 AM | Zoom

REGISTER

Casey Phradichith PE

*Project Engineer at GEI
Consultants*

ATTEND THIS WEBINAR TO LEARN:

- Seismic evaluation of embankment dams is essential in California due to high seismicity, aging infrastructure, and large downstream populations.
- A practical framework is provided for planning and conducting geotechnical explorations to support seismic evaluation.
- Case studies of past explorations will be presented to highlight challenges encountered and the solutions implemented.
