REGISTER NOW

SANTIAGO CABALLERO, PHD, PE
Geotechnical Design Specialist
Turner Engineering Group

Santiago Caballero is a Geotechnical Engineer with about 12 years of experience supporting complex infrastructure and building projects throughout the United States. He has supported projects in Ecuador, Brazil and Saudi Arabia. His background includes geotechnical design for transportation, energy, healthcare, data centers, dams, levees, and federal projects, with expertise in foundations, seismic site response, slope stability, liquefaction, ground improvement, MSE walls, and retaining systems. He serves as a lecturer in civil engineering, teaching graduate-level geotechnical engineering courses at California State University, Fullerton, Loyola Marymount University, and the Pontifical Catholica University in Ecuador. He has presented nationally and internationally at conferences and professional events and has contributed to post-earthquake reconnaissance as part of the GEER teams. In 2024, he was honored with the ASCE James Croes Medal for his contribution to engineering science.
