Attend This Webinar to Learn:

- What is GHAD?
- What are the benefits of a GHAD?
- What are typical GHAD duties?
- How are GHADs funded?
- How do GHADs compare to other entities?
- How have GHADs responded to geologic hazards?

Uri is a Geotechnical Engineer and President of ENGEO, a recognized authority in establishing and managing GHADs. He is a Founding Director and President of the California Association of GHADs. He coordinated the establishment of most of Northern California's GHADs, including the largest GHADs in the state. In all, he has overseen the formation of more than 35 GHADs.

Haley is a geologist at ENGEO specializing in GHAD formation and management. She has supported the formation, annexation, and management of GHADs in Alameda, Contra Costa, Orange, Solano, and Ventura Counties, including preparation of Plans of Control, Engineer's Reports, budgets, staff reports, and resolutions. She actively supports the management of 18 GHADs throughout California, overseeing contracting, monitoring, maintenance, and repair activities.

URI ELIAHU, GE
President
ENGEO

HALEY RALSTON, GIT
Project Geologist
