Students	\$25

Attend This Course to Learn:

- Resources to collect background information on your project site, including geologic setting, groundwater, and site history
- Utility locating requirements and resources
- Permitting requirements, site safety, and training

Lane Klansek is a Project Engineer in GEI's Oakland, California office. Lane has experience in geotechnical engineering analyses, field exploration and inspection, instrumentation monitoring, and construction quality assurance. She has worked on a variety of projects that included geotechnical design and recommendations, dam safety procedures, and alternatives assessments. She has assisted with project work in the dam, levee, mining, waste, and urban development sectors in California.
