

FUNDAMENTALS SERIES: BORING LOGS

THURSDAY, JULY 23 | 11:00 AM - 12:00 PM PACIFIC | VIRTUAL

The Fundamental Series prepares early career geoprofessionals by answering practical questions that you may have not learned in school. This course will discuss the type, quantity, and quality of information that should be included in boring logs and test hole excavations.

Attend This Course to Learn:

- Material Descriptions
- Soil Classifications
- Sampling Information
- Sampling Methods
- Sources of Information and Guidelines

Danny Cohen, PE, GE is a licensed Civil and Geotechnical Engineer with over four decades years of experience spanning geotechnical consulting, construction management, and specialty contracting throughout California. A past president of CalGeo, Danny brings a rare dual perspective to his work — having spent the bulk of his career on the engineering consulting side before transitioning to JC Baldwin Construction Company, where he serves as Senior Project Manager and Estimator, bridging the gap between geotechnical design and field execution.
