

# **Q&A WITH THE CALOES SAFETY ASSESSMENT PROGRAM**

**FRIDAY, AUGUST 7**

**11:00 AM - 11:30 AM PACIFIC | VIRTUAL**

**REGISTER  
NOW**

**CalOES SAP manages and coordinates trained SAP Evaluators to assess the damage level of structures following disasters. Specific assessments follow ATC-20 protocol, assigning ‘Green – Inspected,’ ‘Yellow – Restricted,’ and ‘Red – Unsafe’ placards to buildings. These assessments allow rapid re-habitation of structures and essential facilities post-disaster.**

**California needs engineers from the private sector for its post-disaster emergency recovery efforts. Registering for this webinar allows you to volunteer if you are available to help respond to a future emergency. Help save the day when disaster strikes.**

**MATT COCHRANE, PG**

**ENGINEERING GEOLOGIST**

**CALIFORNIA GOVERNOR’S OFFICE  
OF EMERGENCY SERVICES (CALOES)**
