

# 2023 VALUE REPORT

**CALGEO IS THE ONLY ASSOCIATION FOCUSED  
SOLELY ON ISSUES THAT MATTER MOST TO  
GEOPROFESSIONALS AND RELATED BUSINESSES  
IN CALIFORNIA**

*CalGeo's commitment to supporting the next generation of geotechnical engineers is praiseworthy as they serve students by providing scholarships, mentorship opportunities, and access to networking events and industry professionals. As a two-time scholarship recipient and current CalGeo student leader, I have connected with many people of different backgrounds, learned the latest industry trends and practices, and developed my professional and personal skills. I am beyond grateful to be a part of an organization as supportive, inclusive, and enterprising as CalGeo, as they play a consequential role in helping students like myself reach their goals.*

**MANAAL CHOWDHURY | 2022-2023 CSUS CALGEO CHAPTER TREASURER**

*I have been involved with CalGeo for more than five years, and I am thrilled to share my experience with CalGeo. As a professional practicing geotechnical design and construction working for a specialized contractor, I am very much impressed by what CalGeo provides to the geoprofessionals in the state of California. CalGeo offers a platform to all levels of experienced engineers, continuous learning, and professional growth in the field of geoscience. Their commitment to student outreach, organizing conferences, project awards, scholarships, loss prevention seminars, etc. is commendable. I am actively engaged in a couple of CalGeo committees and feel proud to be part of their professional development initiatives. I highly recommend every geoprofessional in California be part of this awesome organization and expand their skills and professional network. I want to congratulate the new board and look forward to an eventful year ahead.*

**RAVI VEDANTHAM, PE | CONDON-JOHNSON & ASSOCIATES**

*I have been involved with CalGeo for the past two years through the CalGeo at UCLA Chapter. I served as secretary for the club in 2021-2022, and served as president this past school year. It benefited me as a student in my last undergraduate year (2021-2022) as CalGeo connected me to geotechnical engineers in the industry. I met and learned a lot from practicing engineers at the 2022 CalGeo Conference, and I had the privilege of attending presentations where I learned about current projects across California. This past year, CalGeo benefited me as a graduate student as I was able to connect to engineers in the industry and learn more about their work as I prepared to start my career. I had many questions about what's done in practice versus what I learned in school, and the geotechnical engineers involved with CalGeo helped with all my questions. At the 2023 CalGeo Conference, I was more interested in learning about specialty geotechnical services, and I had the privilege of meeting many different companies. Overall, CalGeo has helped bridge my understanding of geotechnical engineering between industry and academia.*

**TAYLOR NGUYEN, EIT | EARTH MECHANICS; 2022-2023 UCLA CALGEO CHAPTER PRESIDENT**

*As a member of the California geoprofessionals community, I sincerely appreciate the value CalGeo has introduced to our industry. Since its establishment, CalGeo has consistently displayed a remarkable commitment to advancing engineering knowledge and our industry's values and introducing our profession to the community and state authorities. CalGeo is focused on the technical excellence of practice for our industry and continues to create a cultural platform for the next generation of geoprofessionals in California. I look forward to contributing my share to CalGeo and continuing being a member of this great organization.*
