

# 2026 VALUE REPORT

**BUILD CALIFORNIA FROM THE GROUND UP**

**MISSION** CalGeo is the leading association dedicated to advancing geoprofessionals and related businesses in California. We foster industry excellence through collaboration, education, professional development, and student engagement while actively addressing the business and public policy issues that impact our profession.

**VISION** To be the leading voice and resource that drives excellence, innovation, and advocacy for the geoprofessional industry in California.

**ORGANIZATIONAL APPROACH** Under the Board's strategic leadership, CalGeo accomplishes its goals through the actions of its committees and day-to-day execution provided by its Executive Director and Management Team.

## STUDENT SHOUT OUTS

Being a part of CalGeo's UCSD student chapter has allowed me to connect with industry professionals in California. As a student, I am focused on my studies in the present but always thinking of ways to grow as a geoprofessional outside of the classroom as well. CalGeo has amazing and accessible resources to learn about different topics related to geotechnical engineering. In person events have been a bridge between industry and students, providing me opportunities to network with people from different companies and to learn.

**LUCIA LANDAVERDE ROBLES | 2025-2026 PRESIDENT CALGEO UCSD**

The California Geotechnical Engineering Association has consistently supported students in their career planning and professional development... As an officer, I developed valuable skills in outreach, community building, and fostering a supportive environment for students on campus. The Sacramento State CalGeo family has experienced both challenges and successes, but throughout those experiences, the organization has continued to break down the barriers between academic learning and practical industry knowledge. It provides students with direct exposure to professional development, certification pathways, and experience in the real world... Becoming part of a team helped me realize how important every individual is within a system and how each role contributes to collective success...

Past peers and mentors within the organization were always willing to help create a strong support system and maintain organized resources that allowed future members to succeed. Through CalGeo, I became more connected to the Sacramento State community, while also witnessing the organization help launch the careers of many aspiring geotechnical professionals. The student chapter promotes a healthy, encouraging environment where students are empowered to grow, advocate for one another, and contribute toward building a better California.
