Re: Request For Sponsorship CSUF CalGeo Student Chapter

Dear potential sponsors,

For over 13 years, California State University, Fullerton has proudly sent teams of dedicated civil engineering students to compete in the American Society of Civil Engineers' Geo-Institute Geo-Challenge. This prestigious national competition brings together top student teams from across the country to showcase their skills in five exciting events: GeoWall, GeoShirt, GeoPoster, GeoVideo, and GeoPrediction.

Our CalGeo GeoWall team has consistently ranked among the best in the nation. The GeoWall competition challenges students to design and construct miniature mechanically stabilized earth (MSE) retaining walls using unconventional materials like kraft paper, all engineered to withstand sand and applied loads. At the 2025 Geotechnical Frontiers Congress in Louisville, Kentucky, our team proudly placed 2nd overall. In past years, we've taken 1st place nationally for our design reports (2017 & 2018) and have maintained a 10-year streak of regional victories, a testament to our program's resilience and excellence.

This year's team brings together a dynamic mix of returning competitors and four passionate new members who are preparing to take on the GeoWall, GeoShirt, and GeoVideo challenges at Geo-Congress 2026, which will be held in Salt Lake City, Utah, from March 9–11.

To make this journey possible, we are seeking sponsorships to help cover travel, materials, and competition-related expenses. Your support would play a vital role in ensuring our students can continue to represent CSUF and the CalGeo community at the highest level.

By sponsoring our team, you're not only contributing to our immediate success—you're also investing in the future of geotechnical engineering. We are deeply committed to representing both our university and our sponsors with professionalism and pride.

Please see the attached sponsorship form for details about our projected costs and the sponsorship packages available. If you have any questions or would like to learn more, we'd be happy to connect.

Thank you for your time and consideration.

Sincerely,

Ronan Eddy
