

Sacramento State CalGeo Sponsorship Proposal

2025-2026

Message to our Supporters

Dear Potential Sponsor,

Thank you for your interest in supporting the CalGeo Student Chapter at California State University, Sacramento. The student chapter is looking forward to working with our supporters to continue our efforts in growing our chapter by providing students project site tours, social events, professional development opportunities, and by hosting monthly meetings each with a presentation from a professional in the industry. Our success could not be possible without the help of our gracious industry supporters. We look forward to continuing to grow as a club with the help of your contribution and will continue to provide opportunities for student to explore the field of geotechnical engineering.

Your contribution will help with the following: food for General Meetings, thank you gifts for our speakers, costs for social events, travel/registration fees for CalGeo events, annual club shirts, officer polos, and support our university's GeoWall team (registration fees), and future Geo-Challenge teams.

Whether you are a continued supporter or a new sponsor, we are grateful to our industry professionals for providing support and guidance to our members as they transition into the geotechnical engineering profession.

Thank you from all of our members,

Kinфу La O

About Us

WHO WE ARE

The CalGeo Student Chapter at Sacramento State University, California is a student-run organization, supported by the California Geotechnical Engineering Association. We are one of only seven CalGeo student chapters in all of California motivated to becoming successful geo-professionals.

WHAT WE DO

Our club acts as a medium to connect students with practicing professionals. Our chapter provides students with a variety of opportunities that they can benefit from. We aim to expand the Geo-Professional industry and provide students an avenue to explore the field of geotechnical engineering.

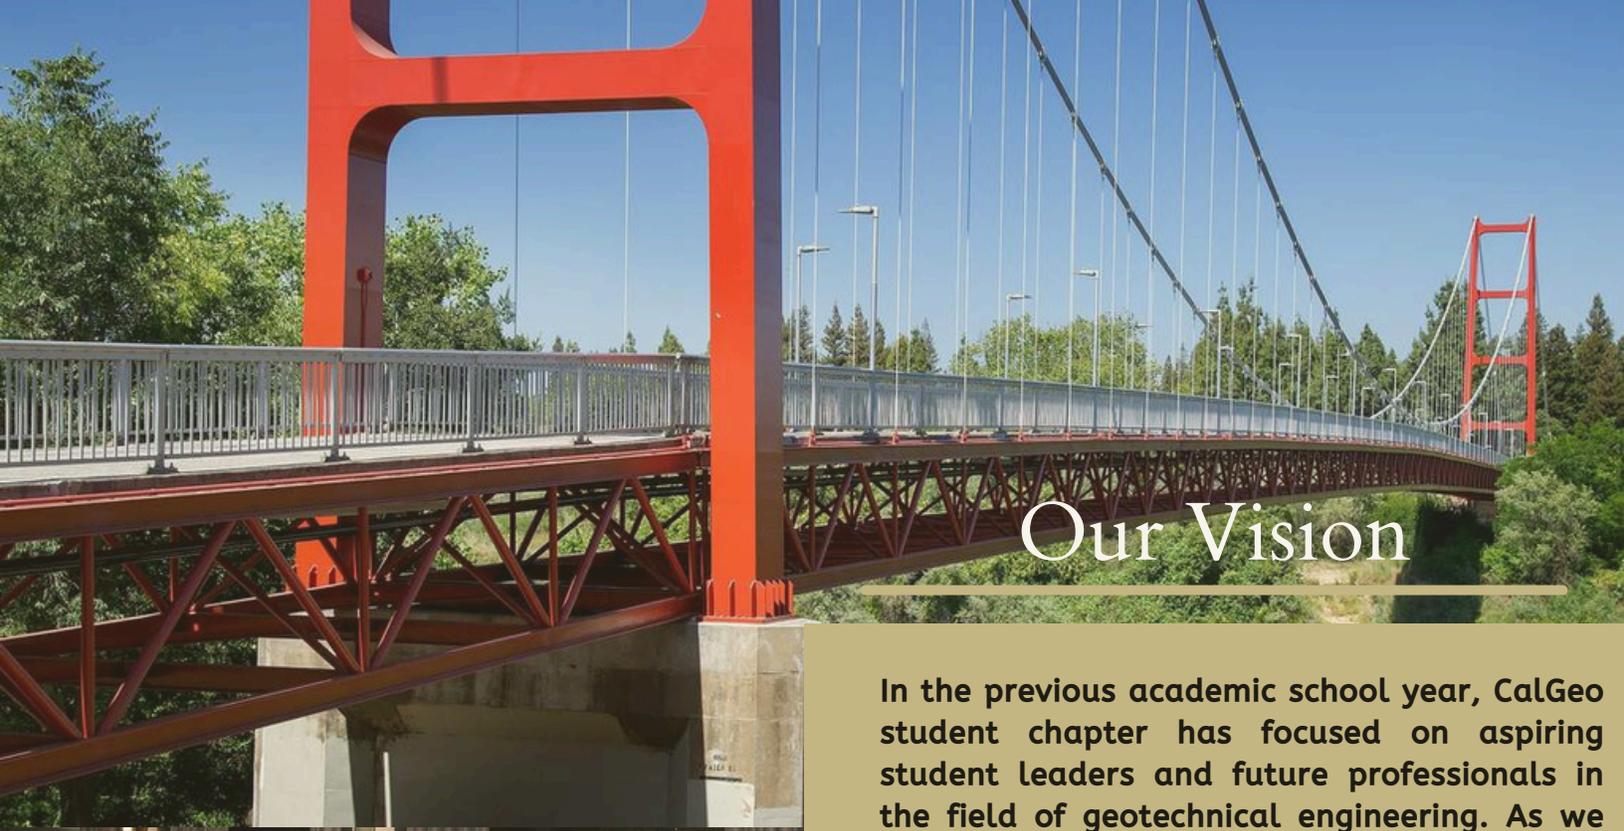

STUDENT INVOLVEMENT

Our intention is to provide an inclusive environment for all of our members. Students can get involved as members, student officer roles, and/or by attending CalGeo events. With various professional events, we love to organize social getaways to relieve the stress of being a student.

GEO WALL

Due to the similarities between the CalGeo Student Chapter and the GeoWall club, we are trying to become more integrated. GeoWall is a competitive project team that designs and builds a small-scale Mechanically Stabilized Earth (MSE) retaining wall. The competition objective is to use the least materials to endure design loads. GeoWall competes in ASCE's Mid-Pac Regional Student Symposium and at Geo-Congress' Geo-Challenge National Competition.

Our Vision

In the previous academic school year, CalGeo student chapter has focused on aspiring student leaders and future professionals in the field of geotechnical engineering. As we continue to grow as a student chapter, new challenges are bound to arise as we transition to the 2025-2026 school year, and we hope to expand our growing network and provide more opportunities for our members. CalGeo student chapter at California State University, Sacramento will strive to continue holding:

- Technical presentations
- Office and lab tours
- Info Sessions
- Resume and career workshops.

As well as being in attendance for

- Emerging professional networking events
- Regional and Annual CalGeo Conferences
- GeoWall regional/national competitions
- and more!

We aim to provide innovative ways for Sac State CalGeo members to network with each other and the industry. To support student success in Sac State CalGeo student chapter, we kindly request support from donors and sponsors such as you and/or your firm. All sponsorships go directly into funding enriching events for our students and industry partners for years to come.
